## DETAILED ACTION

### *Information Disclosure Statement*

Applicant's information disclosure statement of 11/12/03 was filed after the issue fee was paid (8/11/03). Information disclosure statements filed after payment of the issue fee will not be considered, but will be placed in the file. However, the application may be withdrawn from issue in order to file a request for continued examination (RCE) under 37 CFR 1.114 upon the grant of a petition under 37 CFR 1.313(c)(2), or a continuing application under 37 CFR 1.53(b) (or a continued prosecution application (CPA) under 37 CFR 1.53(d) if the CPA is for a design patent and the prior application of the CPA is a design application) upon the grant of a petition filed under the provisions of 37 CFR 1.313(c)(3). Alternatively, the other provisions of 37 CFR 1.313 may apply, e.g., a petition to withdraw the application from issue under the provisions of 37 CFR 1.313(c)(1) may be filed together with an unequivocal statement by the applicant that one or more claims are unpatentable over the information contained in the statement. The information disclosure statement would then be considered upon withdrawal of the application from issue under 37 CFR 1.313(c)(1).

### *Allowable Subject Matter*

Claims 1, 2, 5-9, 18-23, 27-31, 45-50 are allowed.

The following is an examiner's statement of reasons for allowance:

a deposition apparatus comprising a chamber having a movable substrate and a linear array of a plurality of individual plasma sources, each having a cathode, an anode and a gas inlet, and a common reactant gas injector comprising a tubular-walled structure having two linear portions parallel to each other and two end portions connecting the linear portions, wherein the

Art Unit: 1763

*gas injector is disposed between the anodes of the plasma sources and the substrate and is*  
*circumferentially disposed with respect to the plasma sources.*

Neither of the prior art of the record teaches or suggests a common reactant gas injector comprising two linear and parallel portions and two end portions being circumferentially disposed around a linear array of a plurality of individual expanding thermal plasma (ETP) sources.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Parviz Hassanzadeh whose telephone number is (571)272-1435. The examiner can normally be reached on Tuesday-Friday. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Mills can be reached on (571)272-1439. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
